DOOR FRAME CONSTRUCTION

DRE WaterProof adjustable rebated door frame is made of a composite material, a combination of wood flour with plastics and additives that improve durability – all in a strictly controlled extrusion process.

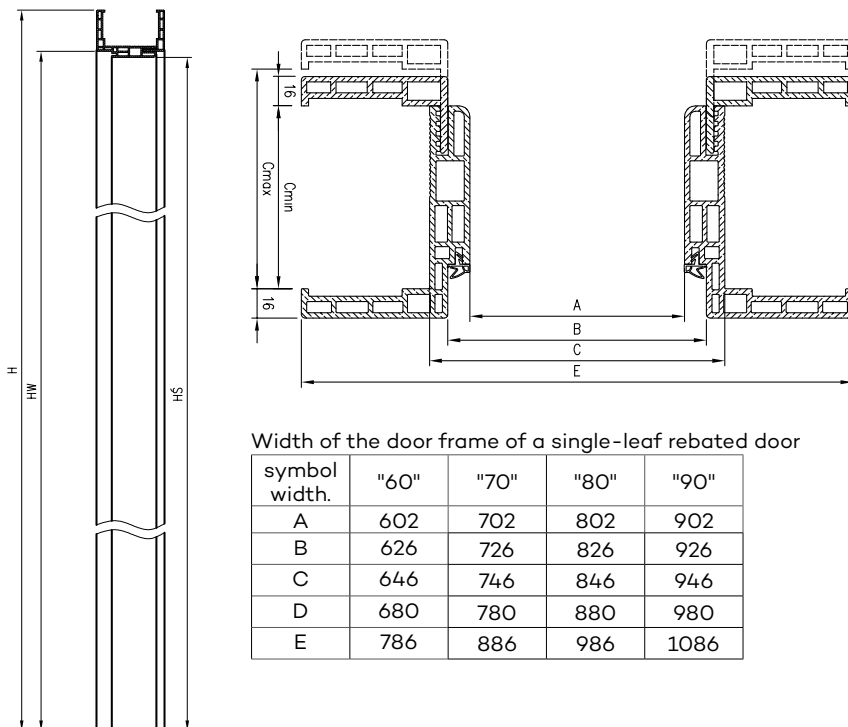

APPLICATION

The adjustable rebated door frame is compatible with all DRE collections in the rebated hinged version. It's ideal for rooms where the door frame is at risk of moisture, such as bathrooms and laundry rooms. DRE WaterProof door frame won't swell or deform, even after a month of complete immersion in water! This is thanks to innovative materials and a precise manufacturing process.

DRE WaterProof door frame is visually identical to MDF models. It features the same decorative finishes. This allows you to match door frames with different properties and use them in the same space while maintaining a consistent aesthetic.

THE SET CONTAINS

Main beam (one horizontal and two vertical elements), door seal, a set of hinges, all necessary components for the installation of door frames in accordance with the supplied instruction. Door frames are packed in cardboard boxes.

Parameters of door height variants

standard height	H	HS	HW
SK "1983"	2061	1969	1981
PL "2043"	2121	2029	2041

Width of the door frame of a single-leaf rebated door

symbol width.	"60"	"70"	"80"	"90"
A	602	702	802	902
B	626	726	826	926
C	646	746	846	946
D	680	780	880	980
E	786	886	986	1086
